COLOR**

STARTING LEVEL: 2/3

PRELIGHTEN: ISO iColor Active Lift + 40-volume developer

FORMULA 1: Joico Vero K-PAK Color Intensity ½ tube Clear + 2 ribbons Cobalt Blue

FORMULA 2: Joico Vero K-PAK Color Intensity Clear + 1/2 tube Peacock Green + 1 ribbon Yellow

FORMULA 3: Joico Vero K-PAK Color Intensity equal parts Cobalt Blue + Peacock Green

FORMULA 4: Joico Vero K-PAK Color Intensity Clear with equal parts Cobalt Blue + Peacock Green

APPLICATION: Beginning at the nape, create a one inch section and apply Formula 1 roots to mid-lengths. Begin working up toward the front, alternating all of the formulas from roots to mid-lengths. Carefully wipe gloves between each section application. Once all sections are saturated, return to the nape and begin alternating the formulas on each section from mid-lengths to ends. Carefully “melt” the color where the two formulas meet in the middle. Work quickly and without foils.
