**1.** Prep hair with Joico Heat Set and dry hair fully. Section hair into 3 sections. The bottom section should extend from top to top of ear. Part the middle section from corner of eyebrows to a point just below crown. Section the remaining hair on the top. Working in the nape section first, wrap hair prepped with Ironclad around a 1-inch barrel iron to create loose waves. Leave the waves intact and spray with JoiShape to hold the curls. **TIP:** Use a towel under the sections you are spraying with InstaTint to protect the client's clothing. For best results, spray 6-12 inches away from the hair.

**2.** Starting at the bottom section, spray the middle wave with Mermaid Blue 3-4 inches down from the root area. Be sure to let each section dry and not run your fingers through hair.

**3.** Spray Orchid to one side of the wave and Amethyst to other side wave. **TIP:** To create an ombré effect, hold InstaTint sprays in a downward angled direction.

**6.** Alternate each section of hair with Mermaid Blue, Amethyst and Orchid. **TIP:** The more InstaTint is layered, the more intense the pigment will be.

**7.** Spray the in-between waves with Amethyst. For an added pop of color and texture, spray Amethyst on the corners of the Mermaid Blue sections.

**4.** For the middle and top sections, take ½ inch subsections and using a flat iron, create ridged waves. Work your flat iron in a waving motion down the strand by pulling towards you and then away.

**5.** Lay out the individual waves on a towel. Spray with JoiShape for hold and definition. Continue creating waves through the entire middle section. **TIP:** Before using a flat iron, protect the hair by using Ironclad.

**8.** Repeat this process throughout the middle section. Your strands should have a combination of all three colors: some Amethyst, some Mermaid Blue, and some Orchid.

**9.** Repeat this process in the top section by creating the waves with a flat iron and then applying all three InstaTint shades. Spray each section in the top 1-3 inches away from the root.
