JOICO

INSTANTINT®  
temporary color shimmer spray

**UNICORN**  
GET THE LOOK KIT

**1.** Prep hair with Joico Heat Set and JoiLotion and fully dry with a paddle brush. Create a mohawk with 5 middle ponytails using an elastic to secure each section. The ponytails should extend from the nape to the front top of the head. Adjust according to density and head shape. **TIP:** Use a towel under the sections you are spraying with InstaTint to protect the client's clothing. For best results, spray 6-12 inches away from the hair.

**2.** Spray Light Purple into the entire top half of the bottom ponytail. **TIP:** InstaTint can be layered to create a more opaque effect.

**3.** Color melt Periwinkle into the bottom half of the ponytail. Spray lightly into the Light Purple section to seamlessly blend the two colors into one another.

**4.** Once all 5 ponytails are done, gently comb through to blend the two colors. Starting at the bottom, twist each section and then use your fingers to gently loosen the twist while holding the end tightly.

**5.** Wrap the twist around the base of the ponytail and secure with a pin. Continue to loosen up the twist to your liking to fit the style. Twist each section in the opposite direction of the previous ponytail. Continue for all 5 ponytails.

**6.** Once all 5 twists are done, it's time to add more color! Take a piece of paper and cut out a circle the size of one of your twisted ponytails to create a shield.

**7.** Use Light Purple, Periwinkle and Violet Opal to add pops of color to the sections. Add sprays of Light Purple on one side and then Periwinkle on the other. This will add more layers of color instantly!

**8.** The finished look should be a mohawk of twists and textures with multi-layered pops of Light Purple, Periwinkle and Violet Opal.

**9.** Arrange heart stencils (not included) on each side of the head (2 inches back from the ear). Spray both Periwinkle and Violet Opal in each heart for an added pop of fun.
